

HOLY CRESCENT COLLEGE OF ARCHITECTURE

Approved by Council of Architecture and affiliated to MG University

Institutional Affiliation to the Indian Institute of Architects

Member of the Indian Green Building Council

B.ARCH PROSPECTUS

Preface

Holy Crescent College of Architecture (HCCA), Alwaye, Cochin was established in 2011, and it is the first Architecture College in Cochin to be approved by the Council of Architecture, Delhi (COA). The institute offers five-year B.Arch degree course affiliated to the Mahatma Gandhi University, Kottayam and has a total intake of 40 students per year. The Institute is affiliated to The Indian Institute of Architects and is an institutional member of the Indian Green Building Council, India.

Holy Crescent College of Architecture is nestled in a serene and picturesque “Green Campus” away from the hustle and bustle of the city at South Vazhakulam, Aluva in Ernakulam. HCCA is committed to shaping the future generation of Architects.

Vision

Moulding a future generation of Architects of the country who can live up to the expectations of the nation and the world.

Mission

When we are constantly faced with challenges with respect to habitable space and sustainability, we strive to contribute our share to the architecture fraternity a set of creative, socially responsible and technically competitive young individuals.

CHAIRMAN'S MESSAGE

Holy Crescent college of Architecture heralds a new era in the history of education in Kerala. Set in a rustic background, far from the hustle and bustle of the city, the students will be able to develop their skills in a peaceful environment. In a world that is fast changing, where there is neck-to-neck competition between and within countries is on the rise, we need to step up and send in vibrant professionals who are competent enough to face the stress and strain of the corporate world. Keeping in mind the age-old values that have been passed onto us by our forefathers, we strive to bring out professionals, who can manage businesses with a strong commitment to the public good. We shall strive to be the best our community deserves.

DEAN'S MESSAGE

While Education, Training, and Research in Architecture are going through a phase of total metamorphism, recognizing and managing shifting paradigms, with the help of the enormous leaps of technology, is the need of the hour. Intense competition and increasing end-use assertiveness force Architects to drastically cut down their response time.

Our vision is to create an Institution par excellence, for imparting quality Architectural education and developing young minds towards developing a much sustainable future.

INTRODUCTION

- i. The College conducts 5-year degree course in Architecture (B.Arch) as per the syllabus of the Mahatma Gandhi University to which the college is affiliated.
- ii. This prospectus is subject to modification, addition or deletion as may be deemed necessary by the Association and subject to the Judgements of the Honourable Courts of Law.
- iii. The prospectus contains the rules and regulations applicable to the seats to be filled by the college to the Management Quota of the B.Arch Course for the year 2020-2021.
- iv. The fee structure shown in the prospectus is as per the agreement with the government for the academic year 2019-20. This is subject to change.

THE PEDAGOGY

At HCCA, Pedagogy is not just our profession, it's our passion. The college aspires for excellence and it is this which galvanizes our teachers to run that extra mile in order to attain all-around academic excellence and utilize it towards improving effectiveness and competitiveness in the industry at large.

HCCA provides new theoretical frameworks that reassess, refines and occasionally redefines the current architectural practice and thinking.

Our teachers who, help to create a platform for brilliant minds to work towards achieving world-class excellence.

We are also firm believers that our Architectural Educational cannot be limited to the four walls. Frequent Workshops, talks by eminent professionals are held.

FACILITIES

LIBRARY

CANTEEN

BD STUDIO MODEL MAKING AREA

STAFFROOM

CLASSROOM

1. Classrooms-There is an academic block equipped with modern and spacious classrooms, with overhead LCD projectors.
2. Studios-There are 4 studios designed and furnished to the highest degree of conduciveness catering student activities.
3. Library-Well maintained library with over 1000 books, magazines, and international publications.it has self-contained reading facilities.
- 4.Conference hall
- 5.Hostels- both boys and girls hostel facilities are available. They are located close to the city
6. Canteen-A bamboo hut was created as part of a bamboo workshop held by Inspiration Kochi.
- 7.Computer Lab- A well equipped, Computer Lab networked with a number of workstations supported by around 30 computers, loaded with latest design softwares which includes AutoCad, Revit, Photoshop, etc. The entire college campus is wifi enabled.
8. Transportation-there are bus services provided to and fro from the hostels and the city to the college.
- 9.Climatology Lab- A Climatology workshop is under construction.it consists of a heliodon.
10. Survey Lab-Equipments are showcased for the students.
11. Plumbing Lab-Equipments are showcased for the students.
- 12.Wifi Campus: The students can access internet facilities throughout the day for their use.
- 13.Online Information System: Parents can have access to their ward's regular performance ie daily attendance, Evaluation results, etc.
- 14.Playground: There is a playground where basketball, badminton, etc can be played.

COURSE CURRICULUM

First & Second Semester

1. Architectural Design-I
2. Building Materials and Construction-I
3. History of Architecture-I
4. Structural Design-I
5. Basic Design
6. Visual Art
7. Architectural Graphics
8. Principles of Traditional Architecture
9. Workshop Practice
10. Mathematics

Third Semester

1. Architectural Design-II
2. Building Materials and Construction-II
3. History of Architecture-II
4. Structural Design-II
5. Computer Application in Architecture-I
6. Climatology
7. Surveying and Leveling
- Documentation of Traditional Buildings

Fourth Semester

1. Architectural Design-III
2. Building Materials and Construction-III
3. History of Architecture-III
4. Structural Design-III

5. Computer Application in Architecture-II
6. Landscape Architecture
7. Building Services-I(Plumbing, Water Supply & Fire Fighting)
8. Human Settlements & Study of Sociology, Economics & Culture

Fifth Semester

1. Architectural Design-IV
2. Town Planning
3. History of Architecture-IV
4. Structural Design-IV
5. Interior Design
6. Architectural Acoustics
7. Building Services-II(HVAC, Lighting & Ventilation)
8. Estimating, Costing & Specification

Sixth Semester

1. Architectural Design-V
2. Working Drawing & Details
3. Building Byelaws, Code of Conduct & Professional Practice
4. Construction Technology & Project Management
5. Urban Design

6. Elective-I(Cost effective technology/Modular Construction)
7. Elective-II(Architectural Photography/Graphic Design in Architecture)
8. Structural Design

Seventh & Eighth Semester

1. Practical Training
2. Dissertation

Ninth Semester

1. Architectural Design- VI
2. Design for Disaster Mitigation & Management
3. Sustainable Architecture (Environmental Design)
4. Architectural Conservation
5. Research Methodology
6. Housing
7. Elective-III/IV

5. Computer Application in Architecture-II
6. Landscape Architecture
7. Building Services-I(Plumbing, Water Supply & Fire Fighting)
8. Human Settlements & Study of Sociology, Economics & Culture

Tenth Semester

1. Thesis and Viva Voce

CAREER PROSPECTS

ARTISTIC DOODLES BY FEMINA MAJEED

Unlike many other professional courses, this programme, as well as the profession, gives the opportunity for self-employment of the individual. Architects with some experience can even set up their own business as a design consultancy firm or other related services.

Architecture students across the globe divert after the undergraduate programme into other specializations like Interior Design, Landscape Design, Urban Design, Town Planning, Graphic Design, Product Design, thereby opening up the job prospects of an architecture student to a much broader industry base. Masters in various specializations also provide them an opportunity to access well-paid academican posts in the numerous architecture colleges sprouting up in the state as well as the country.

Substantial increase in investment in the construction sector has been recorded year after year. As far as architects are concerned, there is a huge gap in demand and supply. The annual requirement of architects, stand over 100,000 which is expected to rise further and training facilities available, still fall short. All these factors contribute to making this field competitive with healthy career prospects.

Employment opportunities for architects are available in the government as well as the private sector. The Government organizations include the Public Work Departments, The Archaeological Department, Ministry of Defence, Department of Railway, Housing Boards. Local bodies responsible for construction work also recruit Architects. Architects also work with research agencies as well as a non-governmental organization dealing with built slum rehabilitation, building science research, urban research openings in the private sector exist with the builders, Architecture Firms, Consultants, etc.

ARCHITECTURAL SKETCHES BY JERRY MICHEAL

LEH OLD TOWN HISTORY

LEH OLD TOWN BASE MAP

The buildings of historic Leh reflect the ancient cultural ties to Tibet. The town can be described as being built in traditional Tibetan architecture. The Tibetans have built few cities, mostly trading centres, as the majority of Tibetans traditionally lived in the countryside as farmers or nomadic herders. A sizeable percentage of the population lived as monks in large monasteries, which often took the appearance of small towns. Therefore Leh is an important example of historic Tibetan urban architecture. THF identified 189 traditional or historic buildings in the old town. The historic buildings fall into three categories:

1. Defensive and administrative structures
2. Religious buildings and structures
3. Residential buildings
